

How COVID-19 has effected the economy and career prospects

Designed by Kai-Wen Lee

The coronavirus pandemic has impacted economy around the world

GDP is a very important indicator to measure the quality of economy. There are a map and two graphs to make you understand the economic impact of the virus so far. In 2020, the only major economy to grow was China that grows 2.3%. The economy of most of contries fall between -5% to -15%. In a advanced economies and emerging markets, we can find that these countries are both recession, and it's about three times as bad as the global financial crisis of 2008 in terms of GDP decline. It can be seen that COVID-19 impacted economy that is so serious.

The coronavirus pandemic impacted employment rate and the types of careers

Many people have lost their jobs or seen their incomes cut in 2020. The unemployment rate of many countries are nearly above 9%. In addition, the type of careers are changed because of COVID-19. Many companies or institutes changed to remote wrok. In 2020, the rate of sharing E-commerce grew at two to five times before COVID-19. It represents the type of careers are changing. In the future, the careers of health aides, techs, stem professionals, and managers will be increased, but educator, property maintenance, and agriculture will be decreased year by year. It can be seen that the change of job type is the future trend.
